

## 9.0.1 Release

- Release Information
- Build Information
  - TinyCore
  - Ubuntu
- Enhancements and Bug Fixes
- Resolved Customer Issues
- Known Issues
- Download Links
  - Ubuntu
  - TinyCore
  - ISO Packages

### Release Information

- Release Version: LiveNX v9.0.1
- Release Date - December 19th 2019
- Release Designation - MD (Maintenance Deployment)

### Build Information

#### TinyCore

APPLICATION VERSION	
Server Version :	9.0.1-20191213-5b8ff74
Web Version :	9.0.1-20191212-5e4c43e+b18
OVA Version :	1.40.0

#### Ubuntu

APPLICATION VERSION	
Server Version :	9.0.1-20191214-48ede4d
Web Version :	9.0.1-20191213-5e4c43e+b119

## Enhancements and Bug Fixes

- LD-25423 - Interface Bandwidth Reports Showing Huge Bandwidth Spike Between Restarts of LiveNX With Low Speed Interfaces
- LD-25434 - Average Bit Rate Values Slightly Different Between "Top Interface Bandwidths" and "Interface Bandwidth" Reports
- LD-25623 - Single Device Filtering Does Not Work Properly if There is No Interface Filter in "Utilization Above Threshold Over Time" Report
- LD-25572 - QoS Interface View: DMVPN Tunnel Policy Structures Not Handled Properly When Multiple Tunnel IPs Are Assigned the Same Policy
- LD-25576 - QoS Interface View: Modifying a DMVPN QoS Policy Causes Separate Branch to Appear
- LD-25650 - DMVPN "Multiple Policies" Label Only Appears When Instantiating the QoS Interface View But Not After The Policies Have Been Updated or the Device Is Refreshed
- LD-25694 - QoS Interface View: DMVPN Tunnel Destination and Policy Name Should Not Have Colors in the QoS Interface View Legends

## Resolved Customer Issues

- LD-25143 - Tags were removed from other sites when one site with that tag is removed
- LD-25000 - Mongo DB sort memory exceeds limit while fetching cisco ise users data
- LD-22185 - Need to optimize reports called on Network Users page
